

THE TECHNOLOGY

A good fresh market cherry, 'Hartland' is sweet, firm, and medium in size. At maturity, the cherry's skin is a deep, glossy purple. 'Hartland's' sugar levels are lower than many commercial cultivars, but taste is consistently rated high. It is an early mid-season producer with a winter hardy, disease tolerant tree.

THE PRODUCT

Cherry 'Hartland'

'Hartland' is a sweet cherry ideal for the processed and fresh markets and uniquely suited as a pollinizer in commercial orchards. 'Hartland' is genetically compatible with most commercial varieties and has good resistance to bacterial canker. This fruit is deep red-purple, of medium size, with consistently heavy crops.
