

THE TECHNOLOGY

Plant Health Care “Harp-N-Tek” is a proprietary technology platform for the production of certain Harpin Proteins that are formulated into products that contain no pathogens. The plants cannot tell the difference. When Harp-N-Tek seed treatments or foliar Plant Health Regulators are applied, the plants “panic” and turn on stress-defense and growth systems. Research, field trials, and producer experience show that the result is improved crop vigor, stamina, nutrient uptake, and reproductive growth.

THE PRODUCTS

MightyPlant

MightyPlant is a plant food product that uses Harp-N-Tek protein technology to produce an enhanced fertilizer. MightyPlant starts with the highest quality, water-soluble complete fertilizer components available, including a full compliment of the essential micronutrients plants need for a balanced diet. The fertilizer is produced by one of the leading manufacturers of professional grade, water soluble fertilizers used by commercial greenhouse and nursery growers around the world.
