

THE TECHNOLOGY

Alstroemeria 'Tangerine Tango' is a winter-hardy Inca Lily with vivid orange petals, intense lemon-yellow highlights, little flecks of brown, and a hint of lime tint. This Inca Lily is native to Chile and can bloom continuously throughout the season until frost. It has a maximum size of 3'x3' and is hardy to the U.S. Department of Agriculture zone 5 which includes western Massachusetts, mid-state New York, northern Pennsylvania, Ohio, Indiana, Illinois, much of Michigan, southern Iowa, Nebraska, northern Missouri, Kansas, and eastern Colorado.

THE PRODUCT

Alstroemeria 'Tangerine Tango'

An absolutely vibrant array of tangerine colored flowers blanket sturdy, upright stems from May until first frost. A creamy yellow throat and deep speckling accentuate flowers. 'Tangerine Tango' puts on quite a show in well-drained, humus-rich soil under full sunlight. It should be protected with a layer of mulch in cooler regions as a uniform soil temperature extends bloom period.
